

Simplicity, Cleanliness

Travelling is emotion

Give your guests the emotion of fragrance and softness. Win them over with the cleanness and beauty of the colours.

Choosing the fragrance for the bedlinen, serving on perfectly ironed stain-free tablecloths and providing soft towels for the bathroom and wellness centre are details which make the difference, the cossetting that makes for satisfied and happy guests.

A satisfied customer is the best publicity!

Treat your linen with care, your guests will appreciate it. When you choose top quality and perhaps customised linen, then difficult stains of grease, wine, fruit and lipstick are not included in the deal!

With IMESA, the linen is washed, dried and ironed with maximum care, avoiding the damage to fabrics and towels often caused by the use of excessively aggressive detergents and sanitising agents.

Opting for an in-house laundry is the answer!

The best hotels stand out for the care and attention they lavish on guests, right down to the last detail.

Give your guests

CLEANLINESS,
FRAGRANCE,
SOFTNESS,

Give them **WELL-BEING.**

WASHING

Fruit of 50 years of product development and experience in the field, the wide range of IMESA washing machines has the answer to all washing needs.

Simplicity, Flexibility and **Productivity** are the distinctive features of IMESA products, conceived to guarantee complete customer satisfaction.

LM SERIES HIGH SPIN WASHING MACHINES

With the LM high spin series, IMESA deploys technology and quality. The new IM11 touchscreen is the latest innovation, an indispensable device, making the washing machine perfect for every customer. We respond to every washing need with a customised series of programmes designed to save energy, water and detergent.

LM 8-23 Kg

LM 26-32 Kg

LM 40-85 Kg

LM 100-125 Kg

RC LOW SPIN WASHING MACHINES

The low spin washing machines in the IMESA RC series combine technology and efficiency.

They are the toughest solution to all washing needs, even in the most difficult environments. Fitted with the new IM11 computer touchscreen, the RC series achieves very high standards of performance

RC 8-23 Kg

RC 30-85 Kg

With IMESA's professional washing machines, the advantages of an in-house laundry are not limited to customer satisfaction alone, but also result in savings in management costs.

IF ONLY MINIMAL SPACE IS AVAILABLE?

The **IMESA TANDEM** optimises the space available for an otherwise impossible professional in-house laundry.

A stacked and completely independent washing machine and dryer for a professional laundry in **half the space**.

Up to 18 kg per hour productivity in less than 1 square metre.

TDM1818

Technology, Reliability

Laundries have been our business since 1968

Tradition and professionalism have made us experts in the hotel sector.

Our expertise, our resources and our investments are targeted to providing customised money-saving solutions for all types of holiday accommodation.

Numerous variables determine the ideal type and size of laundry for each situation.

In IMESA, we design the **BEST SOLUTION** for each structure, considering the space available, dedicated personnel and influence of water, energy and gas consumption on the costs.

Hotels are characterised by:

- Number of beds
- The treatment of guests: overnight stay (bed/bathroom linen) or restaurant service (tablecloth, napkins)
- Additional services: wellness centre, gym, swimming pool etc.
- Laundry service for guests
- Daily productivity required

We take an in-depth look at each individual customer so we can create the ideal high performance installation.

#IMESASOLUTION

DRYING

The IMESA ES series dryer is the drying solution for delicate linen not requiring ironing (towels) and for all tourism activities requiring **high productivity** and **excellent results**.

The ES series is constantly evolving to keep up with the demands of the market and customers.

ES SERIES 10 TO 34 KG TUMBLE DRYERS

What is needed of a dryer?

Drying that is both effective and at the same time delicate to respect the fibres of towels, napkins, runners, sheets, tablecloths and curtains. The ES 10-34 line is designed to operate with the highest productivity and the maximum simplicity of a modern intuitive interface. Continuous R&D makes ES models ever more ergonomic, economical and reliable.

ES SERIES 55 AND 75 KG TUMBLE DRYERS

ES 55 and 75 kg dryers are the optimum solution for medium/high productivity laundries.

The result is perfect drying for all linen, including large items.

The standard drum rotation inversion on all dryers greatly reduces consumption, even with large capacity models.

ES GREEN 10 to 18 kg TUMBLE DRYERS

The ES GREEN electrically heated, closed circuit dryer with HEAT PUMP avoids emissions and tubes to the outside. It can also be installed in closed environments as no outlet is required for emissions.

Why choose a dryer with heat pump?

TO SAVE ENERGY!

The power needed to operate a dryer with heat pump is about one third that used by a traditional dryer.

The energy consumed for one cycle is **LESS THAN 50%** that consumed by a traditional dryer.

Confidence, Force

We have your success at heart

Our primary goal is to satisfy those who operate our machines every day. Our mission is the well-being of everyone who lives a daily life of cleanliness and beauty.

Having an efficient laundry is important to greatly reduce the times and costs of the service and personally manage the quality of the laundry the best way possible.

Managing an external laundry service is more costly than using an in-house laundry, not to mention the possible inconveniences of transport and the risk and cost of losing some of the items.

An in-house laundry with high technology, high efficiency machines optimises productivity of the personnel.

Correct maintenance of the equipment guarantees a smooth running laundry, preventing machine down-time and the resulting regrettable delays.

For us at IMESA, providing an impeccable, fast and reliable service comes naturally. That is why we work day after day to offer you a special experience through our products and our services.

The **ADVANTAGES** of an in-house laundry:

- Controlling the laundry process is important to offer customers high quality and service.
- Controlling the laundry process enables costs to be reduced by more than 50%.
- Controlling the laundry process makes it possible to choose the most suitable treatment for each fabric, avoiding damage caused by aggressive chemical products and excessively energetic cycles, all in respect of the environment.
- Controlling the laundry process prolongs (doubles) the life of the items washed.

#CARINGABOUTYOU

IRONING

The need for ironing, the last phase of the laundry process, is satisfied by IMESA's flatwork and drying ironer lines, designed to [optimise the ironing](#) of all flat linen.

A suitably structured in-house laundry taking the size of the items into consideration can iron from a minimum of 25 kg/h to a maximum of 90 kg/h of flat linen.

FI SERIES FLATWORK IRONERS

IMESA FI series flatwork ironers can rapidly iron all the small or large flat linen typical of hotels: tablecloths, sheets, towels and napkins.

FI 1000-1250-1500 Ø 25

FI 1500-1750-2000 Ø 33

MCA SERIES DRYING IRONERS

IMESA MCA drying ironers dry and iron damp linen simultaneously in a single operation, without having to pass them through a dryer.

They are designed to continuously iron from 35 to 50 kg of flat linen per hour.

The compact size and possibility of installation against a wall make the MCA models ideal for restaurants, pubs and small/medium sized hotels.

MCA 150 - 180 - 210

MCM SERIES DRYING IRONERS

IMESA MCM drying ironers guarantee high performance and reliability.

Hourly production ranges from 60 kg/h to 90 kg/h. Designed for maximum ironing quality, the MCM range is available with:

- motorised output of the linen on both sides for faster ironing,
- the possibility of ironing on two independent lines, with configuration of type of fold: single, double or none.

- suction feed table for perfect fabric feed.

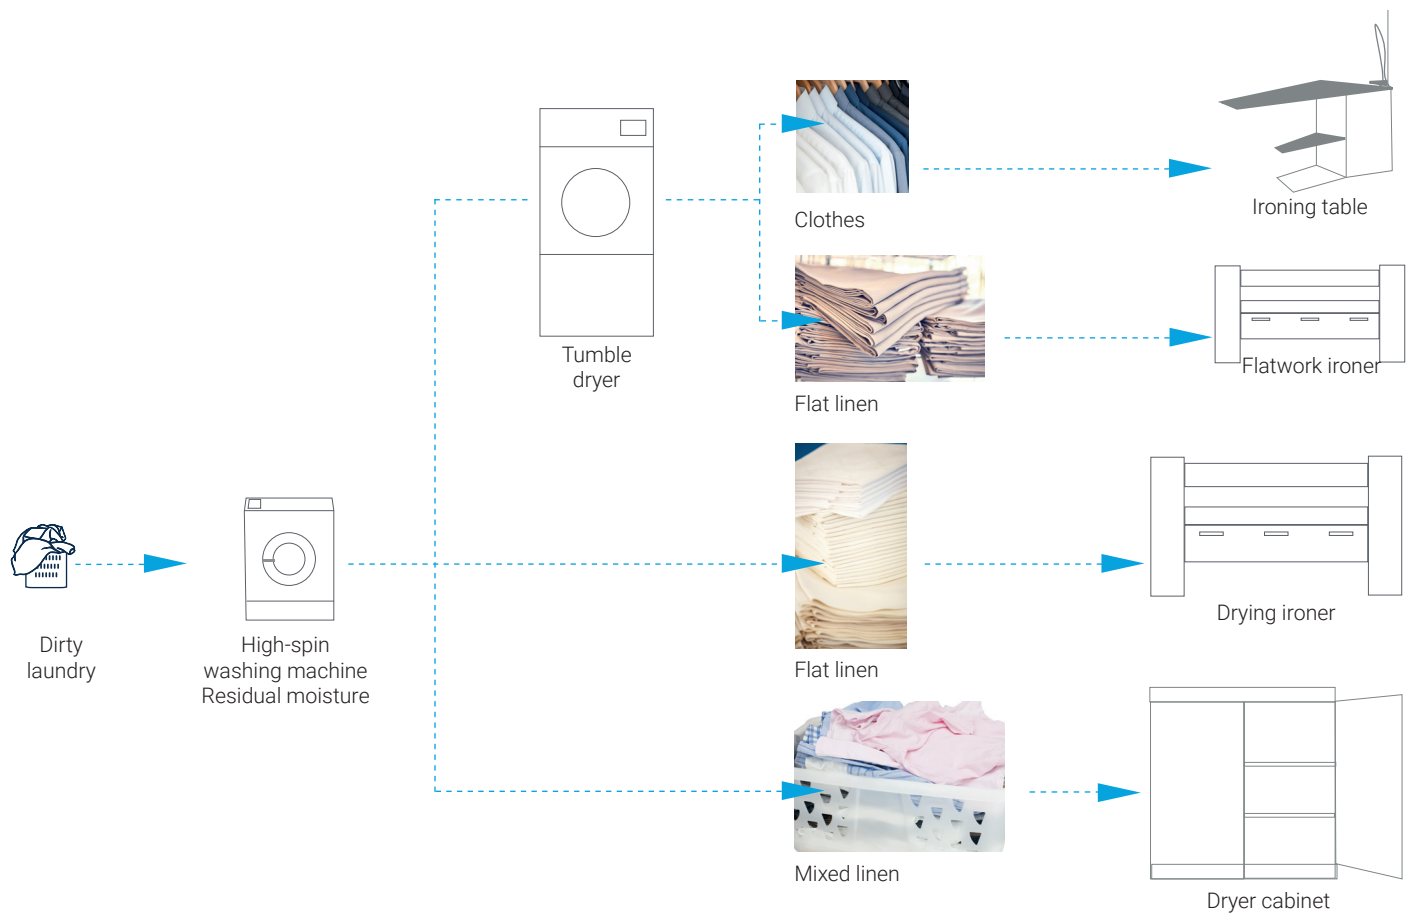

Its advanced technology is expressed in attention to detail.

MCM 2500 - 2800 - 3200
